

# iPhone 5s Speaker Replacement

Prerequisite to remove the speaker after the logic board.

Written By: Sam Goldheart

---

## INTRODUCTION

Prerequisite to remove the speaker after the logic board.

---

### TOOLS:

- [Phillips #000 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Speaker

- Remove the following screws:
  - One 2.9 mm Phillips #000 screw
  - One 1.5 mm Phillips #000 screw
  - One 3.6 mm Phillips #000 screw

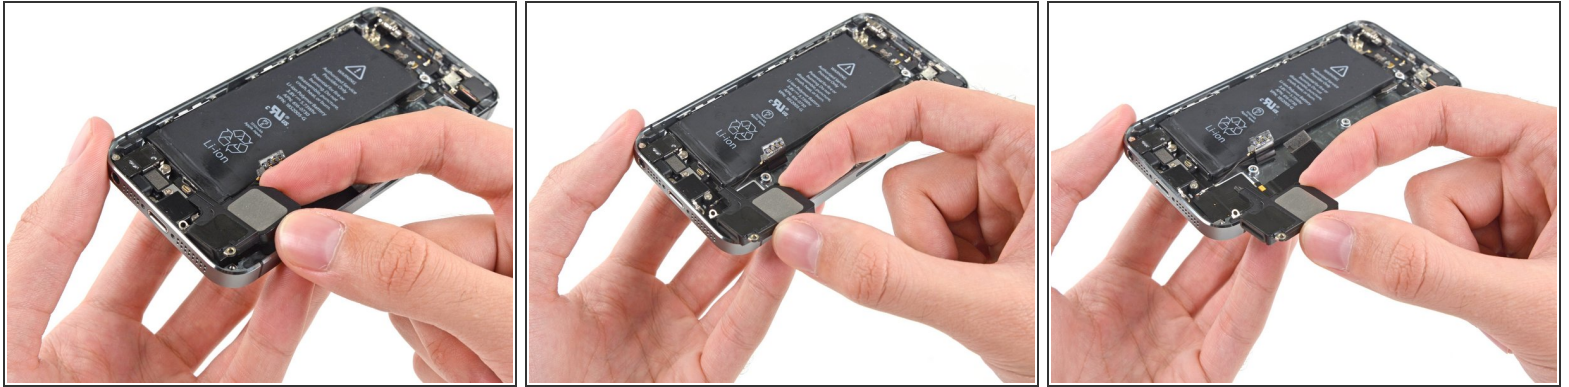

## Step 2

- Use the flat end of a spudger to gently lift the speaker from the rear case.

 Do not attempt to pry the speaker entirely out of the case.

## Step 3

- i** The speaker has a small peg that slides into a slot beneath the home button cable socket.
- Lift the speaker and pull it toward the side of the phone to free this peg from the Lightning connector assembly.
  - Remove the speaker.

To reassemble your device, follow these instructions in reverse order.
