

Apple Studio Display M7649 Stand Replacement

Written By: Alan Truong

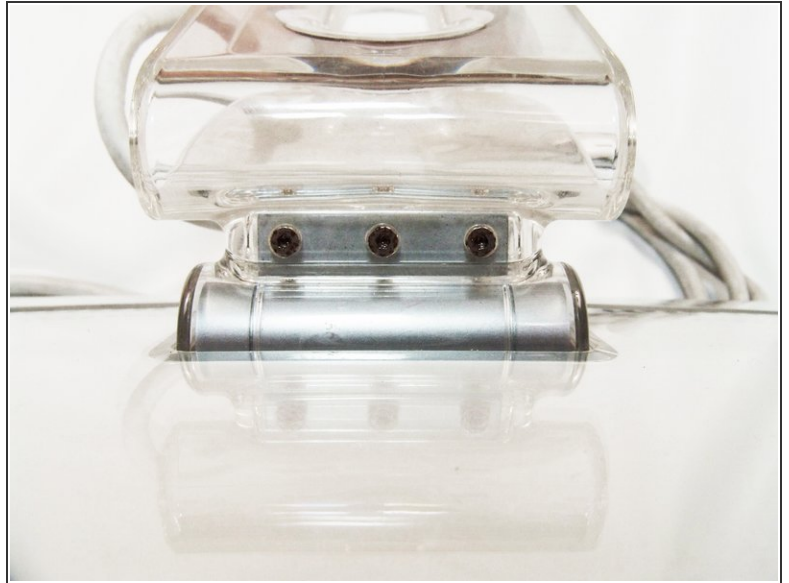

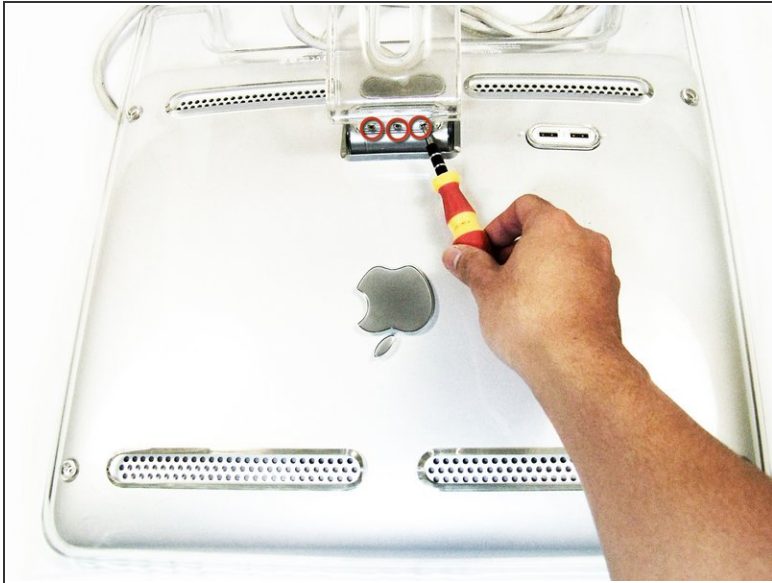

INTRODUCTION

Replacing the stand of the Apple Display. This stand allows the display to be viewed in an upright position.

TOOLS:

- [2 mm Hex Screwdriver](#) (1)
-

Step 1 — Stand

- Lay the display facing down with the stand away from you.
- Remove the three size 2.0 hex screws on the swing arm and remove the swing arm as well as the plastic shield under it.
