Step 3

- Carefully, remove the screen casing using either your hands or a proper tool.

- ⚠️ The casing is very flimsy, so extreme care is required.

Step 4
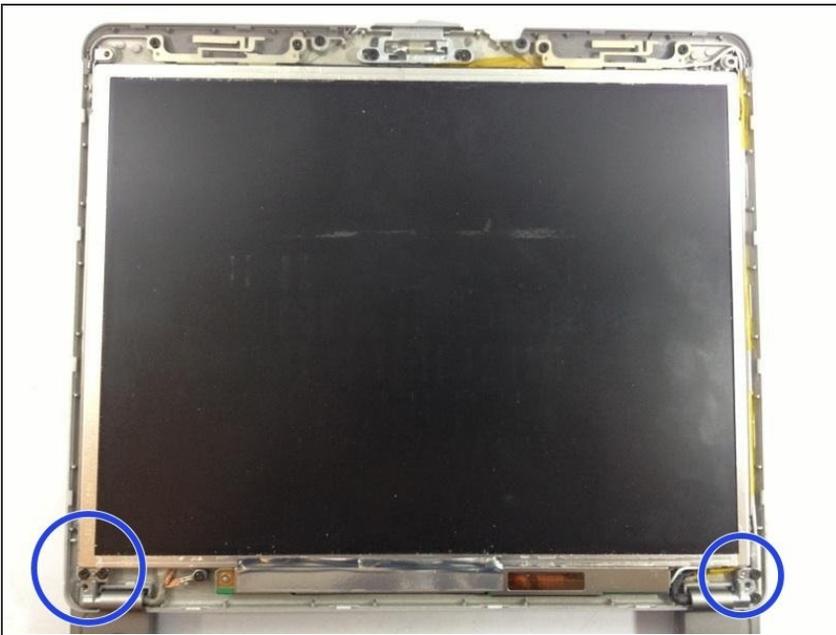

- Remove the 4 mm screws on the bottom left and bottom right corner of the screen.

Step 5

- Carefully lift the screen and place it on it's face.

- Disconnect the wiring attached to the screen.

⚠️ It is important not to damage this wire.

To reassemble your device, follow these instructions in reverse order.
