INTRODUCTION

Removing the back panel from the Toshiba AT1304T

If you can't get a hold of a Torx 6 Security Screwdriver, a small flathead can be used as a substitute

🔧 TOOLS:

- Needle (1)
- Flathead 3/32" or 2.5 mm Screwdriver (1)
- T8 Torx Security Bit Screwdriver (1)

This document was generated on 2020-11-28 01:45:10 AM (MST).
Step 1 — Back panel

- ● Using a thumb-tack, push-pin, or similar pin, remove the four plastic stoppers located on the back panel.

Step 2

- ● With the T8 Torx Security Bit Screwdriver, remove the four screws in the designated locations.

- ⓘ The T8 Torx Security Bit Screwdriver can be substituted with a small flathead screwdriver. Screw removal may be slightly more difficult however.

Step 3

- If needed, use the flathead screwdriver to gently pry the panel from the phone.

- Using your fingers, lift the panel from the device.

To reassemble your device, follow these instructions in reverse order.
