INTRODUCTION

An easy guide for replacing letter keys

🔧 **TOOLS:**

- Tweezers (1)

Step 1 — Letter Key

- Open the laptop on a flat stable surface.

- Using tweezers, grab the desired key on its right side and pull up towards the left.

Step 2
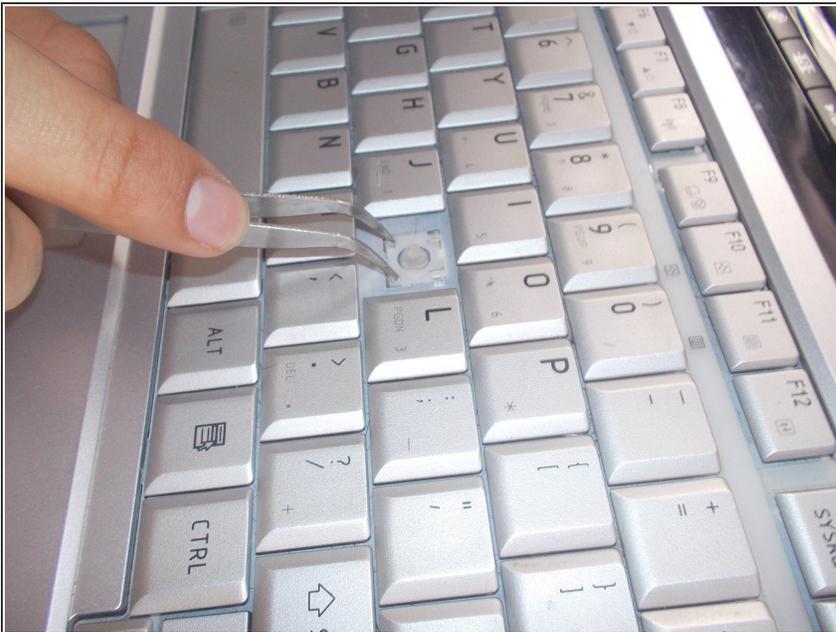

- Insert key holder by pressing down with tweezers until a pop is heard

Step 3

- Once holder is in, place new key over holder and press down, until a click is heard.

If the letter key does not click back into place, remove and place back on to retry.
