

iPad Air Wi-Fi Upper Component Cable Bracket Replacement

Prereq to remove the upper component bracket.

Written By: Sam Goldheart

 **TOOLS:**

- [Tweezers](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Upper Component Cable Bracket

- Remove the three 1.4 mm Phillips #000 screws securing the upper component cable bracket.

Step 2

- Remove the upper component cable bracket.
- ⚠ If you have the Wi-Fi/Cellular model, your iPad will look slightly different and will require the removal of two additional screws to access components covered by this bracket.

To reassemble your device, follow these instructions in reverse order.
