

## **INTRODUCTION**

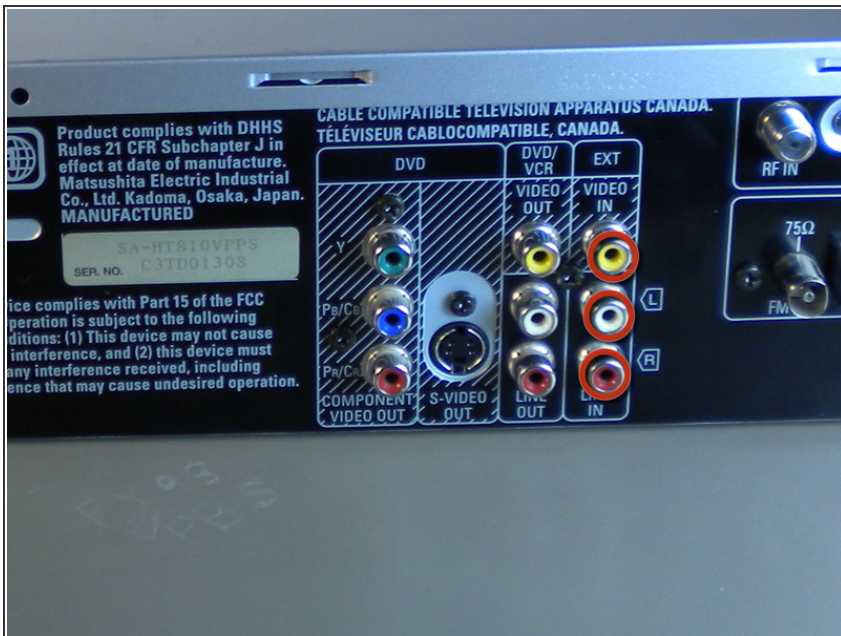

This is a basic guide on how to check your audio/video cables and to make sure that they are all plugged in correctly.

## Step 1 — Checking Audio/Video Cables on Panasonic SA-HT810V

- Make sure that colors match between back of device and cables
- Make sure cables are pressed firmly into both devices at each end of the cable

## Step 2

- Make sure that cables going to the television are not connected to the outputs circled in red.

To reassemble your device, follow these instructions in reverse order.
