LG LX150 Battery Replacement

Written By: Andrea

INTRODUCTION

How to Remove the Battery

Step 1 — Back Cover

- First locate the button and the bottom of the cover where the arrow is. Press down on the button.

- While pushing down on the button, slide the cover up towards the hinge until the cover comes off.

- The battery will be visible after removing the back cover.

Step 2 — Battery

- Simultaneously push the battery forward and pull up from the bottom.

Step 3

- Once the battery is loose it can be easily removed. The phone's ID tag will be visible once the battery is removed.

⚠️ Be careful of damaged or leaking batteries. If your battery appears damaged, remove it with care and find a replacement.

To reassemble your device, follow these instructions in reverse order.
