

IBM ThinkPad T42 Optical Drive Replacement

Written By: Gerald Watanabe

INTRODUCTION

Removing the optical drive is extremely easy and will only take a minute.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Screw Removal

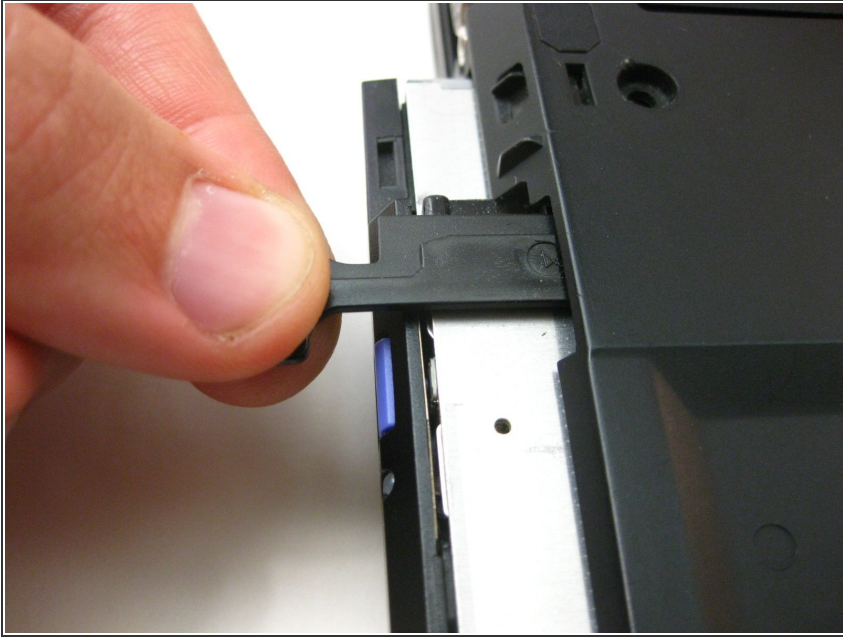

- Remove the single screw holding the optical drive on the underside of the laptop

Step 2 — Unlock Switch

- Push the small slider to unlock position, a tab will automatically pop out.

Step 3 — Drive Removal

- Pull the tab to dislodge the optical drive, then carefully pull the drive out.

To reassemble your device, follow these instructions in reverse order.
