INTRODUCTION

This guide is here to help you replace the battery of your Samsung Galaxy Nexus.

TOOLS:

- iFixit Opening Tools (1)

PARTS:

- Samsung Galaxy Nexus Battery (1)

Step 1 — Back of Phone

- You must open the back of the phone to access the battery. To do this use the plastic opening tools or your fingernail and insert it into the divot.

Step 2 — Removal of Back Cover

- Remove the back cover of the phone by moving the prying tool or your fingernail away from the phone while it is still in the divot.

Step 3 — Removal of Battery

- Insert your finger into the divot of the battery and pull the battery towards yourself to remove.

- This is when a new battery will be inserted.

To reassemble your device, follow these instructions in reverse order.
