

Mac Mini Mid 2010 Optical Drive Replacement

Internal Prereq.

Written By: Andrew Bookholt

INTRODUCTION

Internal prereq.

Step 1 — Optical Drive

- Remove the hard drive from the mini, minding any cables that may get caught.

Step 2

- Remove the 7.9 mm T6 Torx screw securing the optical drive to the outer case.

Step 3

- Slide the optical drive out of the outer case, minding any cables that may get caught.

To reassemble your device, follow these instructions in reverse order.
