

Oppo X9000 Battery Replacement

Replace the battery on your Oppo X9000.

Written By: James Kragh

INTRODUCTION

Use this simple guide to bring life back to your Oppo Find 7a with a new battery.

Step 1 — Removing the Back Cover

- Turn the phone over so that you are facing the back side of the phone.
- With your fingers, pry the back cover up starting from the top of the phone near the headphone jack and camera.
- Completely remove the back cover by moving down the sides and bottom with your fingers.

Step 2 — Removing the Battery

- With your finger, remove the battery from the phone by gently lifting the top-right corner nearest to the camera.

To reassemble your device, follow these instructions in reverse order.
