

Motorola Droid RAZR Maxx Back Cover Replacement

Removing and replacing the back cover of the DROID RAZR Maxx

Written By: sean crocker

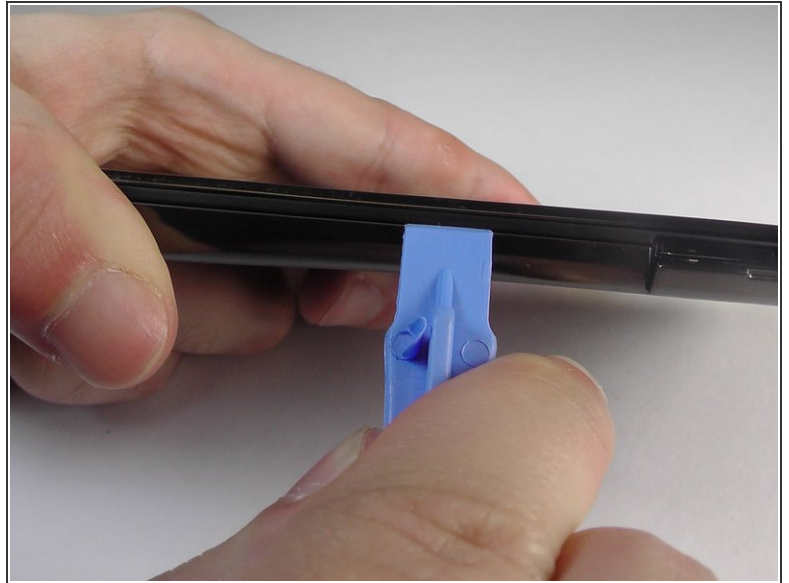

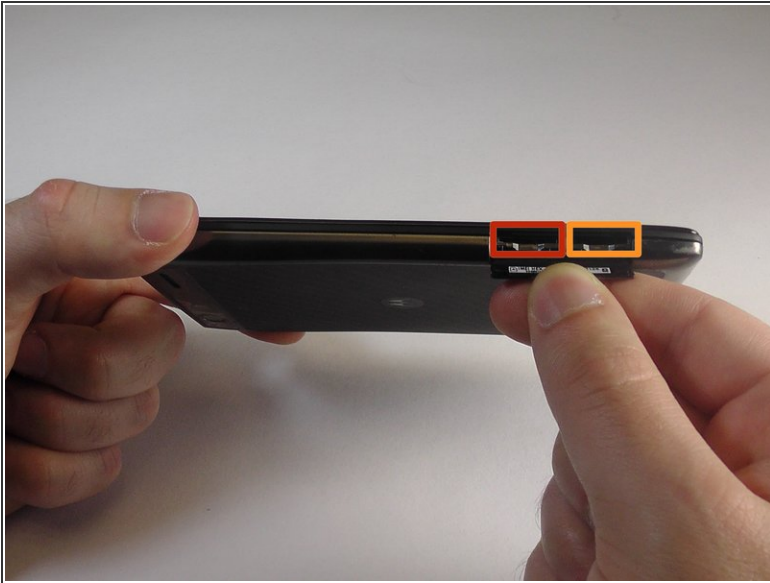

INTRODUCTION

To replace your bulletproof cover that apparently wasn't so life proof.

TOOLS:

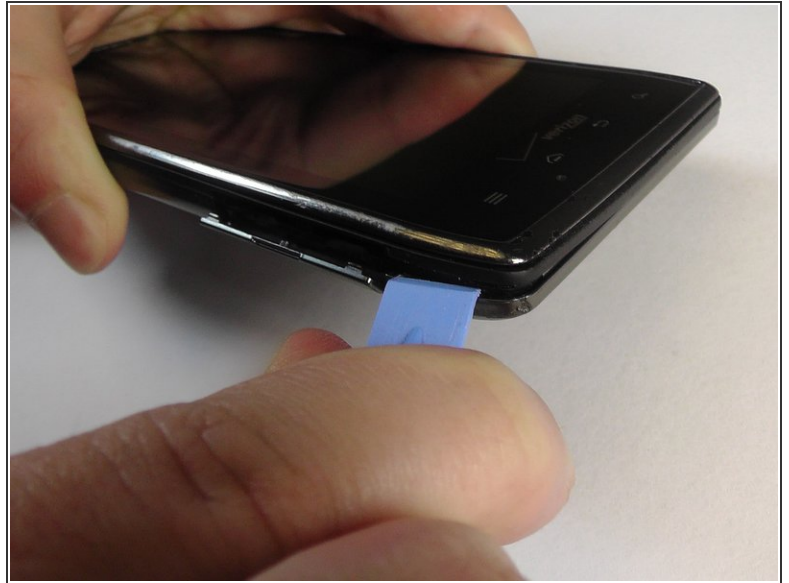

- [iFixit Opening Tools](#) (1)
-

Step 1 — Taking off the Back Cover

- Remove the SIM card.
- Remove the microSD card.
- Insert the plastic opening tool between the back cover and the front piece of the case, freeing the plastic clips between the phone.
- Do this along the back right side of the phone cover until you reach the top.

Step 2

- Use the plastic opening tool to carefully work your way around the top of the phone, freeing the plastic clips.
- ⚠ Be cautious when using the tool around the top of the device because the plastic case is very thin and could easily be cracked or snapped.
- Continue using the tool and pry down the remaining side and the bottom of the phone.

Step 3

- With all the plastic clips released, pull away the back cover from the phone to remove it.
- ⓘ The back cover is attached to the battery with a large amount of adhesive. Some force may be required to pull the back cover from the phone.
- ⓘ The back cover is very durable and will not break from some bending or pulling.

To reassemble your device, follow these instructions in reverse order.
