## INTRODUCTION

This guide will illustrate how to replace the batteries in a Game Boy system.

---

### PARTS:

- [AA alkaline batteries](#) (4)
-

## Step 1 — Batteries

- Switch your Game Boy off and remove the cartridge.

## Step 2

- Use a fingernail (or small coin) to push down on the battery door latch and remove the battery door.
- ⓘ The release latch is a plastic spring clip. If your Game Boy is getting on in years, be careful as the plastic may be brittle.
- ✦ When you're replacing the cover, be sure to get its two plastic tabs into the slots in the bottom of the battery compartment before pushing the cover back in place.

## Step 3

- Use a fingernail to pry each battery outward from the positive (+) terminal to remove them.
- ⚠ Dispose of used batteries properly!
- ⓘ Remove the batteries from your Game Boy before storing it for more than a month or so.

To reassemble your device, follow these instructions in reverse order.
