How to Install LED License Plate Lights

This is a quick and easy guide on how to install new LED license plate bulbs for a fresh new look.

Written By: Eric Wu
INTRODUCTION

If you wanted to change out your license plate lights, installing new LED license plate lamps is actually quite a piece of cake. You will have a new look with minimal effort in no time. This installation will not take much time and is great for beginners.

PARTS:

- 10-SMD 360-Degree Shine LED License Plate Lights (1)
- LED bulbs
  Direct replacement LED bulbs
- Super Bright T10 LED License Plate Replacement Bulbs (1)
- 3014-SMD T10 LED License Plate Lights (1)
Step 1 — Prep work

- You can choose to raise your car with a car lift jack to get better access to the license plate area. This is not absolutely necessary, but will make installation easier.

Step 2 — Removing the stock bulb

- Pull out the license plate lamp assembly and remove the stock license plate bulb.
Step 3 — Installing the LED license plate bulb

- Install back the new LED license plate bulb.
- Test to make sure the LED bulb works.

Step 4 — Putting the license plate assembly back

- Put the license plate assembly back and repeat on the other side.
Step 5 — Enjoy

- Once everything works, you can enjoy your new LED license plate look.

See how easy installing these LED license plate lights are? It's almost unbelievable how a quick and simple installation could make such a difference.
