TOOLS:

- [iFixit Opening Tools](#) (1)
-

Step 1 — Propeller and Gear

- Remove the foam body.

Step 2

- Disconnect the battery by pulling the two red wires apart.
- Remove the battery by releasing the battery retaining straps.

Step 3

- Remove the small retaining clip using a plastic opening tool.
- ⓘ Be careful as these clips can fly off and can be difficult to find.

Step 4

- The propeller, gear, and rod can be removed by simply lifting them off the motor.

To reassemble your device, follow these instructions in reverse order.
