Step 1 — Take off the Keys

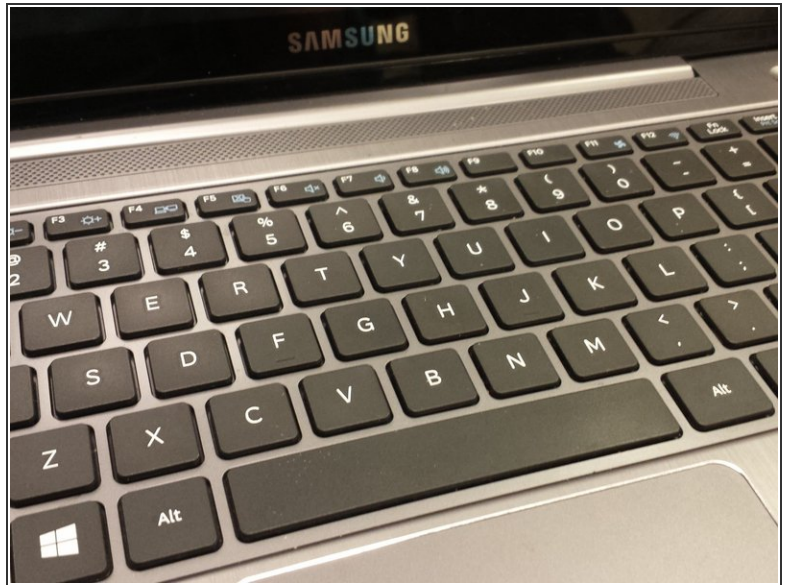

- To take off the keys, simply use the plastic opening tool or a similar pointed object to take off the desired key(s).

Step 2 — Clean Underneath the Removed Keys

- To clean underneath the keys, canned air works well.

Step 3 — Replace A Key

- Place the new key into its location. Press until it "clicks".
- ⓘ Make sure the new key is in the proper place on the QWERTY keyboard.
