INTRODUCTION

If your Touch quickly runs out of battery or if it won't charge, it may be time to replace the battery.

TOOLS:

- [iFixit Opening Tools](#) (1)
small
 - [Spudger](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Back Cover

- With the small plastic opening tool, undo the plastic clips around the back lid.

Step 2

- Gently lift the bottom and pull as the rest of the plastic guides are on a track.

Step 3 — Battery

- Remove these five 2 mm screws using a Phillips #00 screwdriver.

Step 4

- Using the flat end of your spudger, gently pry the battery up and remove it.

To reassemble your device, follow these instructions in reverse order.
