

Acer Aspire R7 Bottom Cover Replacement

Prerequisite Only

Written By: F Fernandez

 **TOOLS:**

- [T7 Torx Screwdriver](#) (1)
- [Spudger](#) (1)
- [iFixit Opening Tools](#) (1)

Step 1 — Cover

- Shut down the laptop and disconnect the power cord
- ⚠ Failing to disconnect or shut down the laptop could result in damage to the laptop or a shock hazard.
- Turn the laptop over

Step 2

- Remove the (6) visible 10mm T-7 screws
- Remove the (4) visible 6mm T-7 screws
- Use the blue plastic opening tool to carefully remove the rubber pad which covers the two remaining screws
- Remove the remaining (2) 10mm T-7 screws

Step 3

- Carefully lift the cover upwards
- ⓘ If the cover seems stuck use a spudger tool to pry the sides

To reassemble your device, follow these instructions in reverse order.
