INTRODUCTION

This guide is to show you how to replace the battery in an Asus MeMO Pad HD 7. This is a simple procedure that can be accomplished by anyone.

TOOLS:

- [Spudger](#) (1)
- [iFixit Opening Tools](#) (1)

PARTS:

- [ASUS MeMO Pad HD 7 Rear Panel](#) (1)

Step 1 — Remove Rear Panel

- Carefully remove the back panel by using a plastic opening tool to remove the panel off the device.
- Pull the back panel away from the device.
- ⓘ The volume buttons can fall out of the case. Pay attention so as not to lose them.

Step 2

- Unlock the ZIF connectors on the data cables.
- ⓘ Raise the white locking tabs by lifting their upper edge - furthest from the battery - they hinge across the width of the connector.
- Remove the cable from its slot by gently pulling downward on the tabs.
- ★ Check that the touchscreen cables are fully seated when reassembling or touchscreen may have unresponsive areas.

Step 3

- Locate the battery connector by following the wires that come from the top right of the battery. To disconnect the battery just lift up gently on the wires. Use a spudger or blue plastic opening tool to gently lift the wires if it is hard to get a grip.

Step 4 — Remove Battery

- Using a spudger carefully pry the battery up. It is glued down so slight pressure may be needed.

 The battery has a soft casing, be careful not to tear the battery casing as chemicals could leak out.

To reassemble your device, follow these instructions in reverse order.
