LG Thrill 4G Phone Buttons Replacement

This guide will show you how to remove and replace the phone buttons on the LG Thrill 4G mobile phone.

Written By: Kenny Richmond
INTRODUCTION

This guide will show you how to replace the phone buttons on your LG Thrill 4G in just a few simple steps. A few tools that you may need are listed below. You should turn off your phone before starting.

TOOLS:

- iFixit Opening Tool (1)
- Phillips #00 Screwdriver (1)
Step 1 — Back Cover Removal

- Pry open the back cover by using a fingernail or a plastic opening tool. There is a small notch at the bottom of the cover for easy removal.

Step 2 — Battery Removal

- Remove the battery from the phone. There is a small ledge located at the bottom of the battery for easy removal.
Step 3 — Screw Removal

- Remove the three Philips #00 screws from the bottom of the phone.
  - Two 5.5 mm screws
  - One 4 mm screw

Step 4 — Speaker Removal

- At the bottom of the phone, there is a small notch to pull up by using your fingernail or the plastic opening tool. This will remove the speaker.
Step 5 — Buttons

Remove the three buttons from the side and the top of the phone.

- Power button
- Volume button
- 3D camera button

Step 6

- Place the plastic opening tool under the bezel at either bottom corner of the HDMI cover.
- This loosens both the HDMI and USB covers for easy removal.
- USB Cover
- HDMI Cover
Step 7

- Remove the six Philips #00 screws within the mid-cover bezel.
- Phillips #00 screws

To reassemble your device, follow these instructions in reverse order.
