

# Nexus 7 2nd Generation Back Cover Replacement

This guide will demonstrate the removal process of the back cover. This will provide access to the device's internal components.

Written By: Heather

## INTRODUCTION

This guide is used to replace the back cover of the device or as a precursor to accessing the internal components of the device.

### TOOLS:

- [iFixit Opening Tools](#) (1)

### PARTS:

- [Nexus 7 \(2nd Gen\) Rear Case](#) (1)
- [Nexus 7 \(2nd Gen LTE\) Rear Case](#) (1)

## Step 1 — Back Cover

- Power down your device.
- Use your plastic opening tool to wedge between the seams around the sides of the device. Pry open each side, one at a time.

 Do not pry near the USB port at the base of the device as you may crack the rear panel.

## Step 2

- Work fingers around the seam between device and back cover. Use your plastic opening tool and fingers to separate each side until device and back cover are completely apart.

 Be careful around the corners. The body of the device can be fragile.

To reassemble your device, follow these instructions in reverse order.
