

LG 1010 Front Cover Replacement

How to replace the front and back case in the LG 1010 cellular phone.

Written By: Nicholas Schmidt

 **TOOLS:**

- Flathead 3/32" or 2.5 mm Screwdriver (1)
 - Spudger (1)
 - T6 Torx Screwdriver (1)
-

Step 1 — Front Cover

- Use a Spudger to remove the two front plastic covers to reveal screws.

Step 2

- Remove two screws using a Torx T6 screwdriver.

Step 3

- Pry off the screen front cover with a small flathead screwdriver.

Step 4

- Insert a small flathead screwdriver into the hinge and separate hinge connection.

Step 5

- Pry off the speaker which is glued on to the front cover using a small flathead screwdriver.

Step 6

- Remove remaining portion of the front case from the flexible circuit board.
- ⚠ Do not attempt to remove the LCD board at this time, as it is attached to the rear panel assembly.

To reassemble your device, follow these instructions in reverse order.
