

MacBook Pro 13" Retina Display Early 2015 Trackpad Cable Replacement

Prereq only

Written By: Sam Goldheart

 **TOOLS:**

- [T5 Torx Screwdriver](#) (1)
 - [Spudger](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Trackpad Cable

- Use the flat end of a spudger to pop the trackpad connector straight up off its socket on the logic board.

Step 2

- Lift the trackpad cable up off the battery to separate it from the adhesive securing it.
 - ⚠ Be careful not to damage the cable. If it doesn't peel up easily, apply a little heat from an iOpener, heat gun, or hair dryer to soften the adhesive, and try again.

Step 3

i If necessary, peel back any tape covering the trackpad cable connector.

- Use the end of a spudger to flip the retaining tab on the ZIF connector.

Step 4

- Pull the trackpad cable straight out of its ZIF socket on the trackpad control board.

Step 5

- Remove the single 3.7 mm T5 Torx screw securing the battery board to the upper case.

To reassemble your device, follow these instructions in reverse order.
