

# MacBook Pro 15" Core Duo Model A1150 RAM Replacement

Written By: iRobot

## INTRODUCTION

Two RAM slots allow up to 2 GB of PC2-5300 RAM.

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)

### PARTS:

- [MacBook Pro 15" Model A1150 Memory Maxxer RAM Upgrade Kit](#) (1)
- [PC2-5300 1 GB RAM Chip](#) (1)
- [PC2-5300 2 GB RAM Chip](#) (1)
- [PC2-5300 512 MB RAM Chip](#) (1)

## Step 1 — Battery

- Use your fingers to push both battery release tabs away from the battery, and lift the battery out of the computer.

## Step 2 — Memory Door

- Remove the three identical Phillips screws from the memory door.
- ☑ Make sure to record which sets of screws came from where. This will help when re-assembling.

### Step 3

- Lift the memory door up enough to get a grip on it, and slide it toward you, pulling it away from the casing.

### Step 4 — RAM

- Release the tabs on each side of the RAM chip at the same time. These tabs lock the chip in place and releasing them will cause the chip to "pop" up.

## Step 5

- Pull the chip directly out from its connector.
- ⓘ If there are two RAM chips installed, repeat the above procedure for the second chip.

To reassemble your device, follow these instructions in reverse order.
