---

## INTRODUCTION

This guide will teach you how to replace buttons that are not functioning properly. This will use a screwdriver and a plastic opening tool. There are no hazards involved.

---

### TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — Battery

- Pull the battery cover away from the handle by gripping near the thumb groove.

## Step 2

- Gently pull the battery out of the handle.
- ⚠ Excessive force could damage wires.

## Step 3

- Disconnect the battery by pulling the connector away from it.

- Positive first
- Negative second

⚠ When replacing the battery, this order is reversed.

## Step 4 — Buttons

- Remove the battery cover from the device by pulling it straight out.

## Step 5

- Using the plastic opening tool remove the front and rear yellow covers.

 When removing the back cover, be careful not to lose the buttons as they are not connected.

## Step 6

- Remove the two 3.1 mm Phillips #0 screws.

## Step 7

- Pull the two halves apart.

⚠ Be careful not to lose any components on the inside.

## Step 8

- Realign the buttons with the button terminals.
- Red terminal to red button.
- Orange terminal to orange button.
- Yellow terminal to yellow button.

To reassemble your device, follow these instructions in reverse order.
