Step 1 — Back Cover

⚠ Make sure the phone is powered off.

● Remove the rear cover by placing the plastic opening tool in the groove on the bottom left side of the LG G4 and gently prying up.
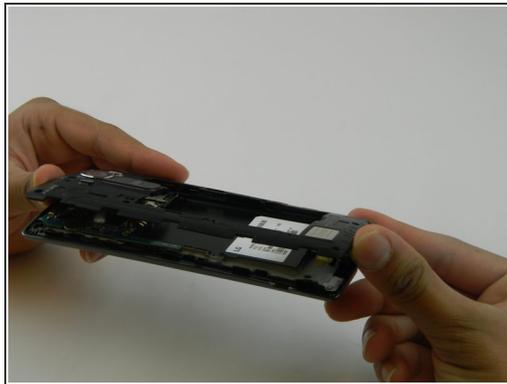

Step 2

● Place the plastic opening tool at the bottom edge of the battery and lift up. Carefully remove battery with your hands.
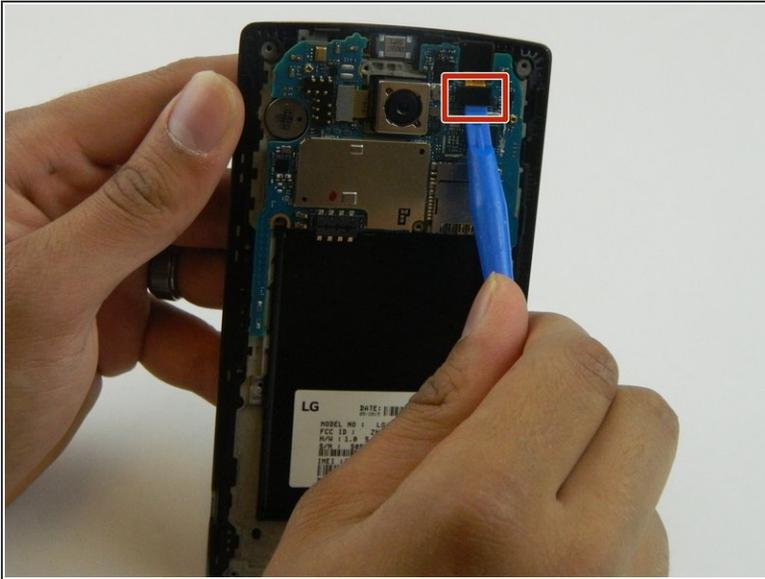

Step 3

- Remove the **eleven** 3.9 mm Phillips #00 screws found at the back of the phone.

Step 4

- Once all the screws have been removed, place the plastic opening tool in the lower left corner and firmly lift the cover up.

- Detach the cover with your fingers

Step 5 — Headphone Port

- Gently wedge the plastic opening tool under the ribbons where each of the three cables are connected, and gently lift up to detach the cable.
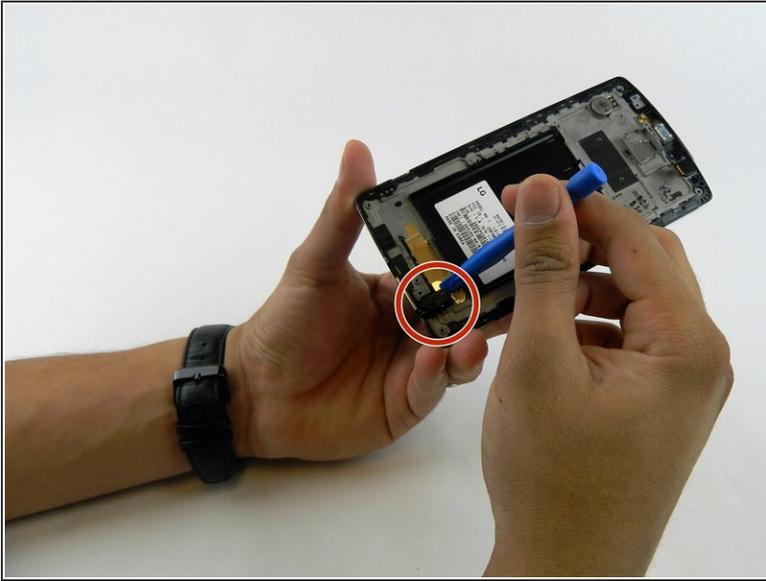

- ⓘ This will allow you to remove the motherboard and give access the headphone port.

Step 6

- Remove the motherboard by lifting it up using the plastic opening tool and your fingers .

Step 7

- Place the plastic opening tool under the upper left corner of the headphone port, and lift up.

- The headphone port is held in place with adhesive so it may take some time to pry it loose.

- Remove the headphone port with your hands.

To reassemble your device, follow these instructions in reverse order.
