

# Samsung Galaxy Tab 4 7.0 Back Panel Replacement

In order to replace all other components of the Galaxy Tab 4 7.0, you must first take off the back panel. If you are simply looking to replace the back panel, this guide will serve that purpose as well.

Written By: Briana Honeycutt

## INTRODUCTION

We are going to show you how your plastic opening tools will allow you to remove the back panel of your tablet.

---

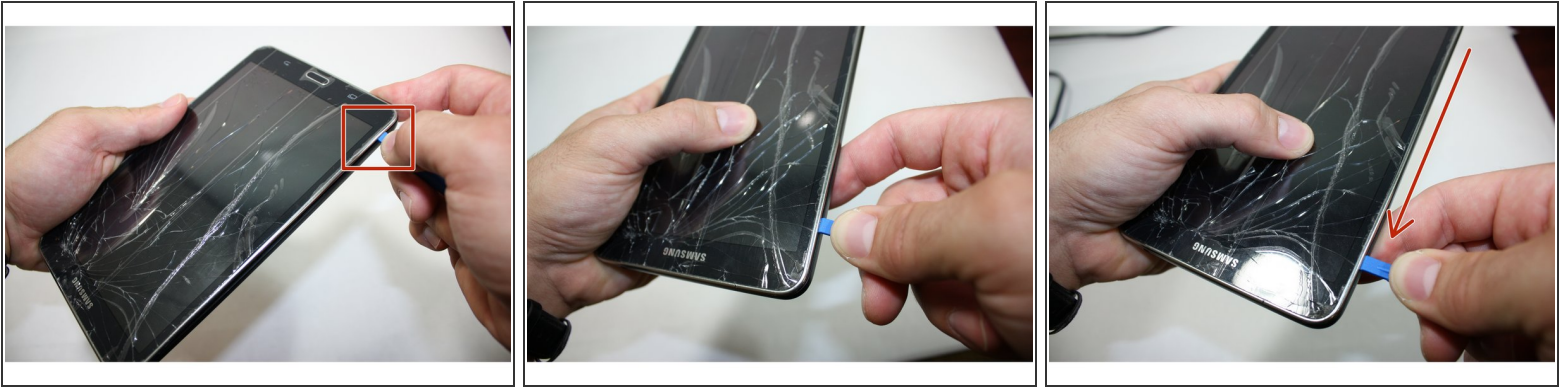

### **TOOLS:**

- [iFixit Opening Tools](#) (1)

### **PARTS:**

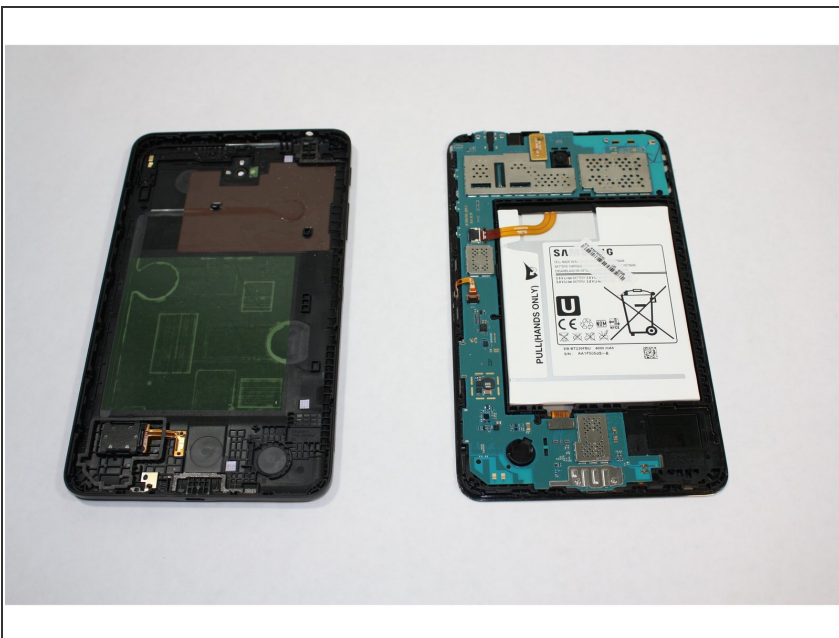

- [Galaxy Tab 4 7.0 Rear Panel](#) (1)
-

## Step 1 — Back Panel

- Starting from any corner of the tablet, carefully insert the plastic pry tool into the gap between the chrome frame and black back panel.
- Slide the pry tool around the tablet to release the plastic locking clips. Pry the back plastic case down and slightly away from the device while the screen is facing up.

## Step 2

- Carefully separate the rear case from the front panel assembly .
- At this point, you will be able to complete any component replacements necessary.
