Step 1 — Rear Case

- Remove the base by pushing in the button and sliding out the unit.

Step 2

- Remove USB port cover from back plate with a metal spudger.

- ⓘ This will prevent the cover from falling under the back plate once it is removed.

Step 3

- With the Phillips #02 screwdriver, remove the six 6 mm length x 6 mm head screws from the back plate.

- With the Phillips #02 screwdriver, remove the ten 6 mm length x 8 mm head screws from the back plate.

  (i) These screws have different threads and need to be kept separate.

Step 4

- Remove back plate with a plastic opening tool by slowing prying around the entire plate.

  ⚠ Be gentle to avoid breaking the plastic clips which hold the plate.

- Once separated the plate easily lifts off.
