

# Logitech M705 Teardown

You will be able to teardown your Logitech...

Written By: Francesco Palmisano

# INTRODUCTION

You will be able to teardown your Logitech Mouse in case of problems

---

## TOOLS:

Phillips #1 Screwdriver (1)

---

## Step 1 — Logitech M705 Teardown

- First of all You have to remove battery

## Step 2

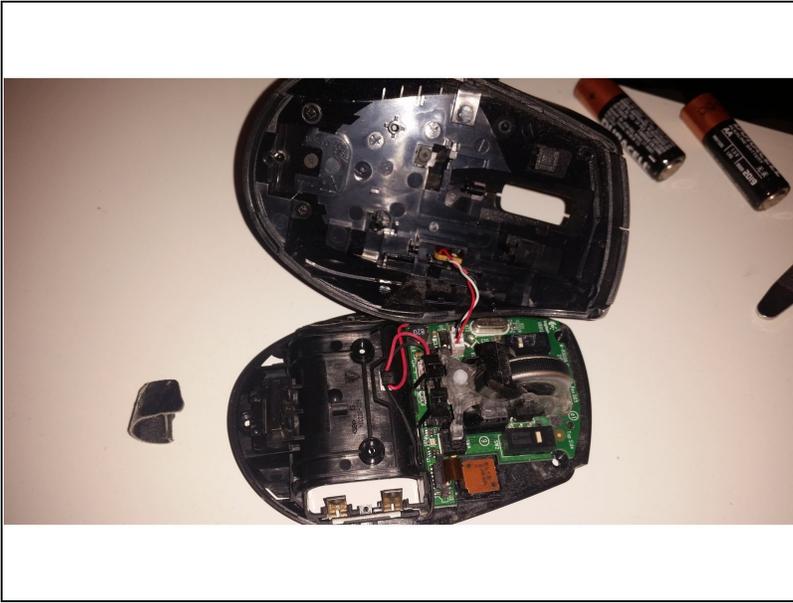

- Unscrew the screws under the label
- Unscrew the single screw below the USB-dongle space

## Step 3

- Under the rubber on the top of the mouse there are other screws

## Step 4

- I had a problem with the right click: I solved with a shim on the little switch
- Here we are!

---

To reassemble your device, follow these instructions in reverse order.
