

# HTC HD2 Midframe Replacement

Replace the midframe of your HTC HD2.

Written By: Sam Luedloff

---

## INTRODUCTION

Use this guide to replace the midframe of your HTC HD2.

---

### TOOLS:

- [Spudger](#) (1)
  - [T5 Torx Screwdriver](#) (1)
-

## Step 1 — Battery

- Carefully pull the rear cover from the back of the phone.
- Place a finger beneath the small lip on the left side of the battery.

## Step 2

- Lay the phone down on its screen.
- Lift up on the lip and pull the battery from the phone.

### Step 3 — Midframe

- Remove the four black 3.5mm T5 screws from the back of the phone.

## Step 4

- Insert the flat end of a spudger between the midframe and the display.
- Slide the spudger along the seam between the frame and the display.
- Using the spudger for leverage, carefully pry the midframe away from the display assembly.
  - ⓘ This process will take some effort. Continue to pry slowly and carefully until the frame begins to detach.
- As it releases, pull the midframe away from the phone.
- ⓘ The volume control tab may fall off during removal. It can be easily reattached.

To reassemble your device, follow these instructions in reverse order.
