Canon PowerShot SD700 E18 Error Replacement

This guide will show you how to clean the lens of the Canon Powershot SD700 IS if you experience the E18 error.

Written By: Aaron Lee
INTRODUCTION

If you experience the E18 error, go to this site and try their solutions.
http://www.e18error.com/repair.html

If you still experience the error, you can follow this guide to disassemble the camera and manually clean the inside of the camera and the lens.

TOOLS:
- Phillips #00 Screwdriver (1)
- Soft Brush (1)
- Tweezers (1)
Step 1 — Outside Case

- Turn off the camera by pressing the power button above the LCD screen.
- Remove the battery and memory card.

Step 2

- Remove the screws on the bottom of the camera using a #00 Philip's head screwdriver.
Step 3

- Remove the screws on the right side of the camera.

Step 4

- Remove the screws on the left of the camera underneath the "A/V out Digital" cover flap.
Step 5

- Remove the screw on the bottom of the camera near the battery and memory card slots.

  This screw will be longer than the rest of the screws.

Step 6

- Remove the front, back, and side casings from the camera.
Step 7 — E18 Error

- Clean the lens and the area surrounding the lens with a brush.

ℹ️ Tweezers can be helpful when removing sand.

⚠️ Reassemble the camera and if the E18 error persists, further disassembly of the camera may be required.

To reassemble your device, follow these instructions in reverse order.
