## Step 1 — Bottom Cover

- Remove cover for the extended battery connector. Use your finger nail or a plastic opening tool to remove it.
- Remove the two rubber feet at the back of the computer, these can be removed in the same way.

## Step 2

- Remove the four 5.6mm Philips #00 screws located at the top of the computer.
- Remove the eight 3.6mm Philips #00 screws on the base of the computer.

## Step 3

- Using a plastic opening tool, pry the plastic casing away from the base of the computer, the remaining clips around the edges can be released using your hands.
- ⓘ Leave the side with the USB and audio port until last, then slide the case out and off, so the audio port doesn't get caught.

## Step 4 — Internal Battery

- Once the bottom cover is removed, peel away the piece of tape located near the fan and heat sink assembly.

## Step 5

- Remove the three 4.2mm Philips #0 screws located at the top of the battery.
- Simply lift the battery away from the computer.

To reassemble your device, follow these instructions in reverse order.
