TOOLS:

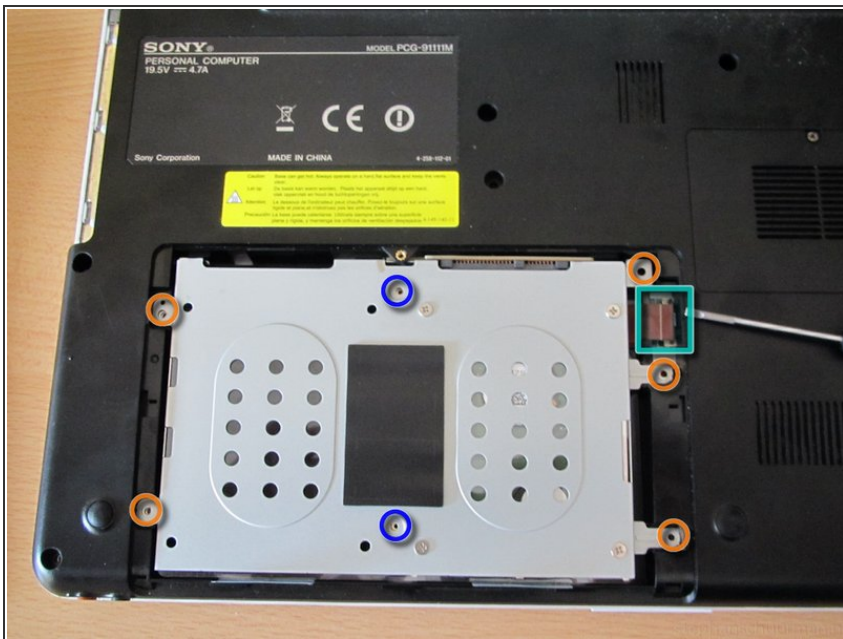

- [Essential Electronics Toolkit \(1\)](#)
-

Step 1 — Keyboard

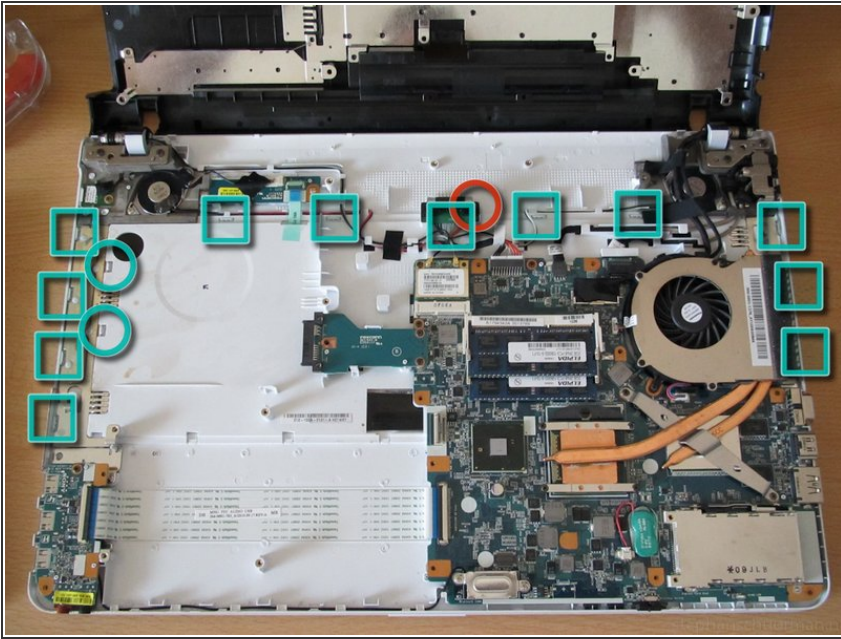

- Remove the following color-coded screws:
 - These screws secure the RAM and hard drive covers, respectively.
 - These screws secure the optical drive to the lower case of the laptop.
- ⚠ The various other screws highlighted in the picture are unnecessary to remove and should be done at your own discretion.

Step 2

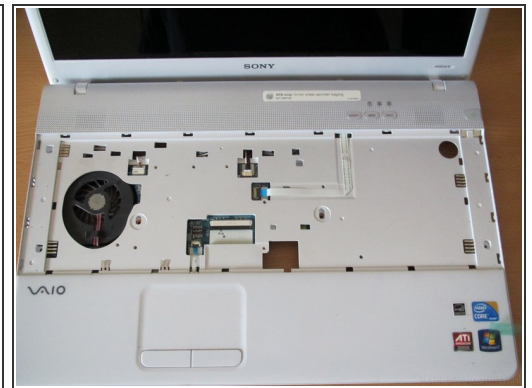

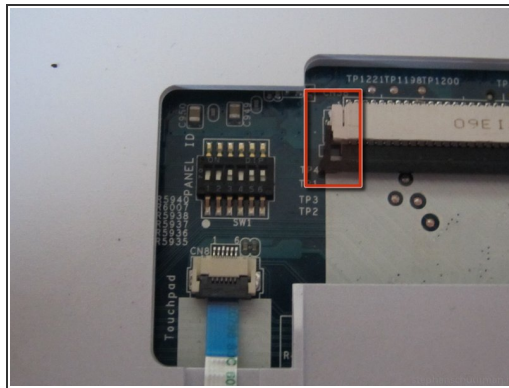

- Remove the following screws:
 - Five screws highlighted in orange.
 - Two screws highlighted in blue.
- Pry the hard drive connector upwards from its socket on the logic board.

Step 3

- ⓘ Release the highlighted clips to remove the upper case of the keyboard.

Step 4

- Flip up the retaining flap (highlighted in red) on the keyboard ribbon cable ZIF socket.
- ⚠ Be sure you are prying up on the hinged retaining flap and not the socket itself.
- Pull the keyboard ribbon cable straight out of its socket toward the front edge of the laptop.
