the HTML code into your website and the guide will display as a small widget.

But hey, let's demonstrate how to embed a guide with an embeddable guide! Because we're just that meta.

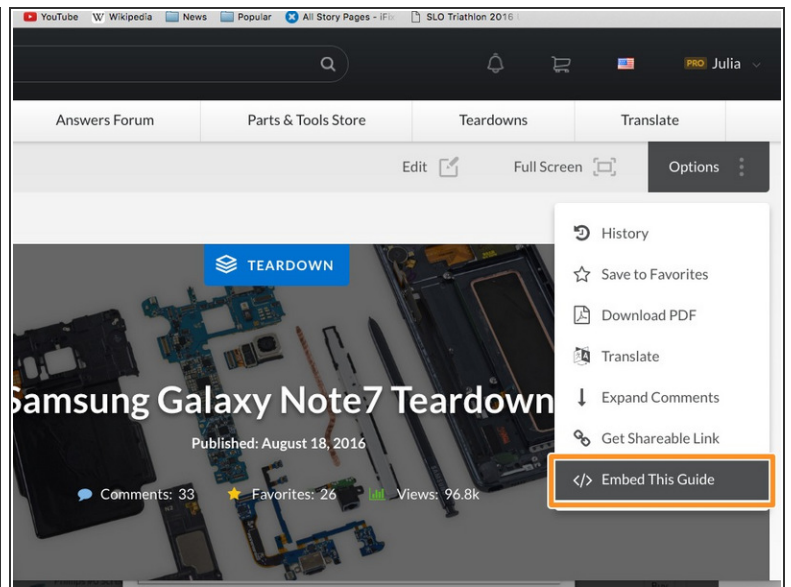

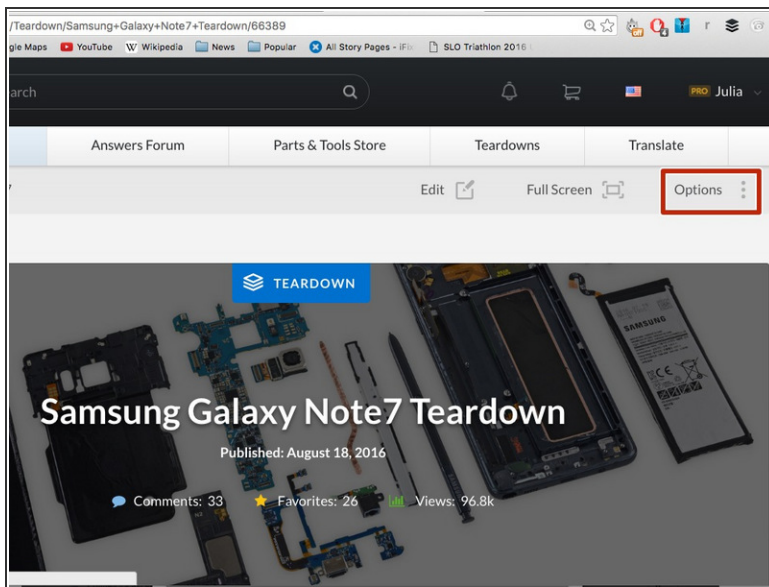

Samsung Galaxy Note7 Teardown
Author: Scott Havard

INTRODUCCIÓN

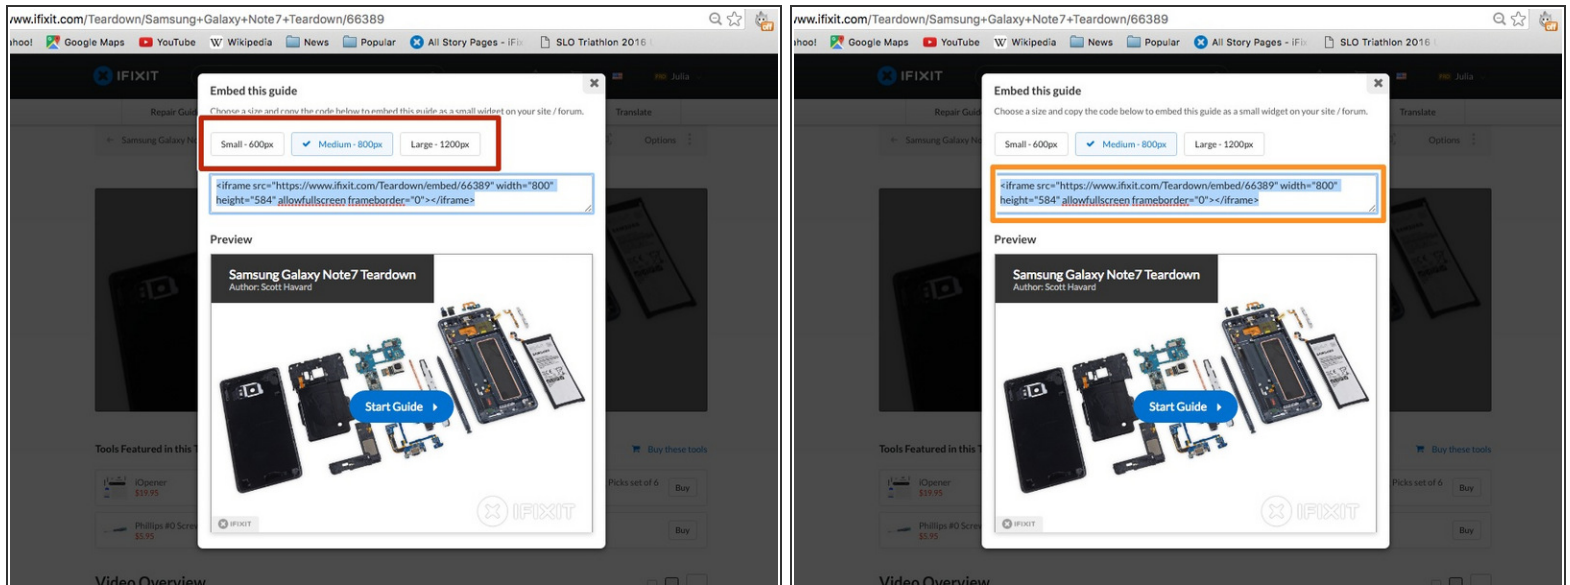

En esta guía, aprenderás a cómo capturar y embeber un código HTML que te permita publicar una guía o desmontaje iFixit.

Paso 1 — Crea un código embebido

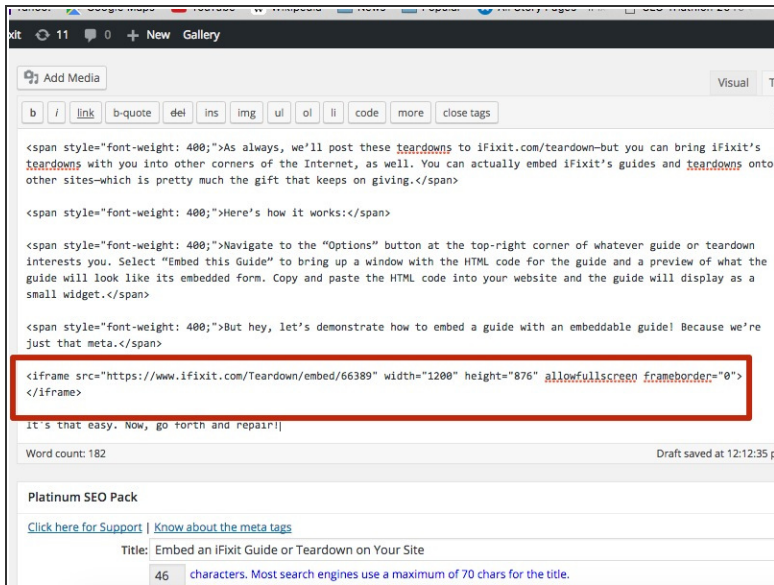

- Navega hasta la página de la guía o del desmontaje que quisieras embeber.
- Haz clic en el botón "Opciones" en el extremo superior derecho de la página.
- Selecciona "Embeber Esta Guía" desde el menú desplegable.

Paso 2 — Copiar código embebido

- Aparecerá una ventana emergente con un código HTML embebido y una vista previa de tu guía embebida.
- Selecciona de qué tamaño quieras que sea tu guía embebida.
- Copia el código HTML generado automáticamente.

Paso 3 — Guía embebida en tu sitio

The screenshot shows the iFixit editor interface. At the top, there's a toolbar with options like 'Add Media', 'Visual', and 'Text'. Below the toolbar, there's a text area containing HTML code for embedding a guide. The code is as follows:

```
<span style="font-weight: 400;">As always, we'll post these teardowns to ifixit.com/teardown-but you can bring ifixit's teardowns with you into other corners of the Internet, as well. You can actually embed ifixit's guides and teardowns onto other sites-which is pretty much the gift that keeps on giving.</span>
```

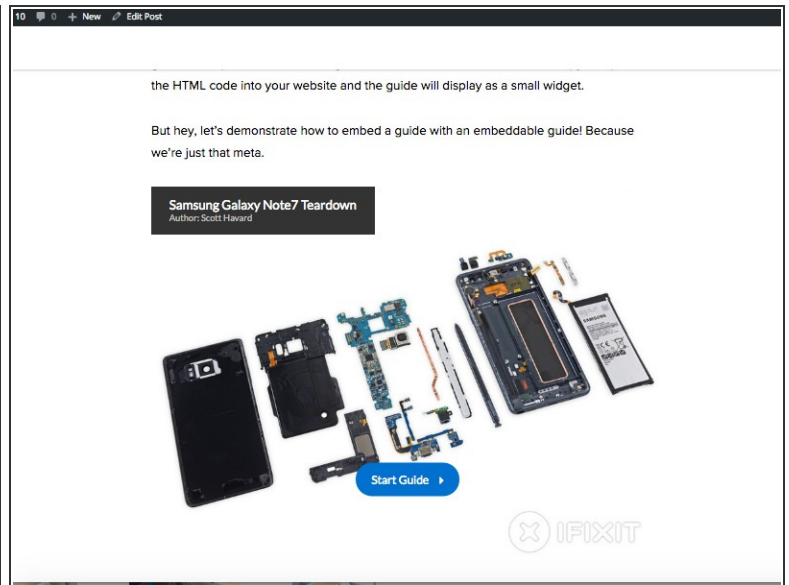

```
<span style="font-weight: 400;">Here's how it works:</span>
```

```
<span style="font-weight: 400;">Navigate to the "Options" button at the top-right corner of whatever guide or teardown interests you. Select "Embed this Guide" to bring up a window with the HTML code for the guide and a preview of what the guide will look like its embedded form. Copy and paste the HTML code into your website and the guide will display as a small widget.</span>
```

```
<span style="font-weight: 400;">But hey, let's demonstrate how to embed a guide with an embeddable guide! Because we're just that meta.</span>
```

```
<iframe src="https://www.ifixit.com/Teardown/embed/66389" width="1200" height="876" allowfullscreen frameborder="0"></iframe>
```

Below the code, there's a 'Word count: 182' and 'Draft saved at 12:12:35 p'. At the bottom, there's a 'Platinum SEO Pack' section with a title field containing 'Embed an iFixit Guide or Teardown on Your Site' and a character count of 46.

The screenshot shows the iFixit website interface. At the top, there's a header with '10' and 'New Edit Post'. Below the header, there's a text area containing the following text:

the HTML code into your website and the guide will display as a small widget.

But hey, let's demonstrate how to embed a guide with an embeddable guide! Because we're just that meta.

Below the text, there's a preview of an embedded guide for 'Samsung Galaxy Note7 Teardown' by 'Author: Scott Harvard'. The preview shows a collection of disassembled phone parts and a 'Start Guide' button. The iFixit logo is visible in the bottom right corner.

- Pega tu código HTML en el cuadro de texto del sitio.
- ¡Disfruta de tu guía embebida!
