Huawei P9 Battery Replacement

Use this guide to replace the battery in your Huawei P9 smartphone.

Written By: Tobias Isakeit
INTRODUCTION

Use this guide to replace the battery in your Huawei P9 smartphone.

Before disassembling your phone, discharge the battery below 25%. The battery can catch fire and/or explode if accidentally punctured, but the chances of that happening are much lower if discharged.

TOOLS:
- SIM Card Eject Tool (1)
- P2 Pentalobe Screwdriver iPhone (1)
- Suction Handle (1)
- Spudger (1)
- Phillips #00 Screwdriver (1)
- Tweezers (1)
- iOpener (1)

PARTS:
- Huawei P10 Lite, P9, P9 Lite, and Honor 8 Replacement Battery (1)
**Step 1 — Back Cover**

1. First switch off your phone and remove the SIM card tray.
2. Unscrew the two Pentalobe P2 screws located at the bottom next to the device's USB C port.

ℹ️ If the screen is cracked you might want to use some tape to protect your eyes from glass shreds and get a better grip to open the phone.

**Step 2**

- Use an iSclack or a suction handle to separate the display unit from the rear panel.

⚠️ Don't remove the rear panel completely yet. There is a cable connected to it! It is running from the finger print sensor to the display unit.
Step 3 — finger print sensor

- Disconnect the finger print sensor using a spudger.

Step 4 — Battery

- Unplug the antenna cable.
- Remove the sticker that sits on top of the screw.
Step 5

- Unscrew the two Phillips #00 screws that hold the metal plate in place.
- The plate, which is covering the battery connector, has two little hooks on each side. Use a tweezer to free them and unhinge the plate by carefully moving it upwards.

Step 6

- Now you can unplug the battery connector and bend it aside.
Step 7

- Free the ends of the adhesive pull tabs to get a good grip on them.
To reassemble your device, follow these instructions in reverse order.
