

MacBook Pro 15" Unibody Late 2008 and Early 2009 Battery Replacement

If your battery no longer holds a charge, use this guide to replace it with a new one.

Written By: Walter Galan

INTRODUCTION

Replacing the battery on a MacBook Unibody is an easy task.

PARTS:

- [MacBook Pro 15" Unibody \(Late 2008/Early 2009\) Battery](#) (1)
-

Step 1 — Access Door

- With the case closed, place the Unibody top-side down on a flat surface.
- Depress the grooved side of the access door release latch enough to grab the free end. Lift the release latch until it is vertical.

Step 2

- The access door should now be raised enough to lift it up and out of the Unibody.

Step 3 — Battery

- ⓘ Be sure the access door release latch is vertical before proceeding.
- Grab the translucent plastic tab and pull the battery up and out of the Unibody.
- If the latch is depressed it will lock the battery in place.

To reassemble your device, follow these instructions in reverse order.
