

Amazon Tap Battery Replacement

This guide will show you how to replace the Amazon Tap battery.

Written By: Hillary Baker

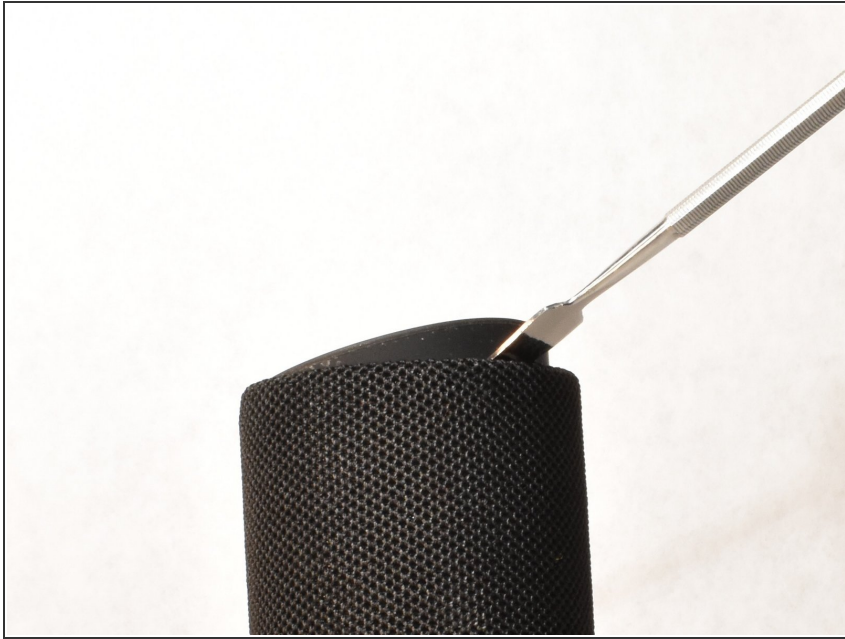

INTRODUCTION

This brief guide will instruct you on how to replace the battery in your Amazon Tap.

TOOLS:

- [Metal Spudger](#) (1)
 - [T6 Torx Screwdriver](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Battery

- Use a metal spudger to remove the rubber control panel at the top end of the speaker.

Step 2

- Starting from the bottom, peel back the Tap's rubber footing.
- Use a T6 screwdriver to remove the the Tap's base.

Step 3

- Time to break through the Tap's exterior. The only way in is to disassemble the Tap from the outside.
- First to go is the Tap's stretchy fabric wrap. Unroll the stretchy fabric from the sticky cowling.
- After removing the stretchy fabric completely, the adhesive cowling remains.

Step 4

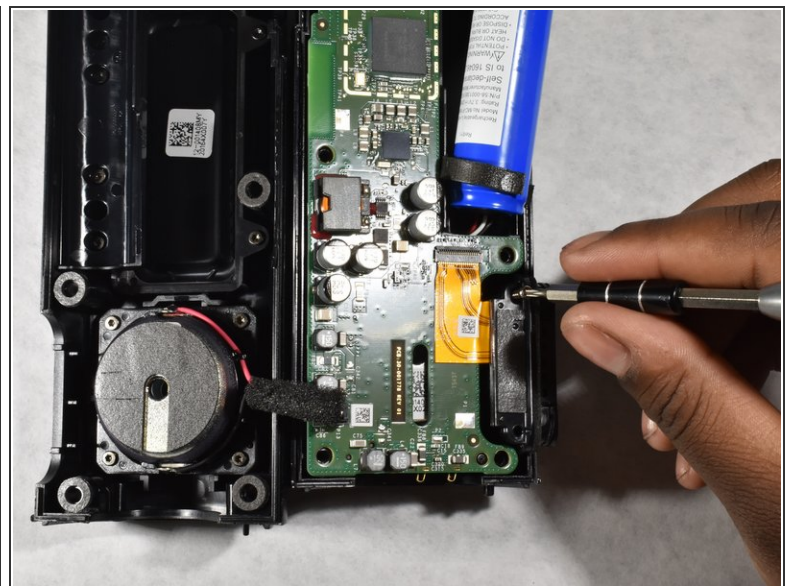

- Next up: removing the stubborn cowling.
- ⓘ This step requires many pry tools, and even more patience.
- The key is sliding the cowling over the microphone, Bluetooth, and power buttons.
- Progress! Once the cowling is off only a few screws remain until we reach the interior.

Step 5

- Use a pair of tweezers to remove the speaker button.
- Since the button is round, it is best to hold it steady and wiggle it in a slow motion until it comes loose.

Step 6

- Once you remove the buttons its safe to pull apart the Amazon Tap.
- Here you will find a standard 18650 Lithium Ion cell, battery.
- Remove it and insert a new one.

To reassemble your device, follow these instructions in reverse order.
