INTRODUCTION

Remove your access door to replace RAM chips or to gain access to your iMac's internals.

🔧 **TOOLS:**

- Phillips #1 Screwdriver (1)

Step 1 — Access Door

⚠️ Before you work on the computer, unplug the computer and press the power button for 20-30 seconds to drain the stored energy in the power supply.

● Loosen the two Phillips screws securing the access door to your iMac.

ⓘ These screws are captive in the access door.

Step 2

● Remove the access door from your iMac.

To reassemble your device, follow these instructions in reverse order.
