## Step 1 — Display

- Remove the 6 outer screws on the underside of the laptop.

- Open the battery compartment and remove the 7 visible screws.

- Pry the corners of the bezel at the base of the keyboard, pushing up until it loosens.

- Carefully remove the ribbon connections of the keyboard, power button, and wifi button.

- Disconnect and re-connect the white monitor ribbon located on the left side to make sure it sits firmly in the connection.

- Reassemble the laptop by following these steps in reverse.

- The monitor should work when powered on again.

To reassemble your device, follow these instructions in reverse order.
