Repairing with Others

Why not run your own repair event in a community, or schools, or as part of a larger sustainability programme?

Written By: Philip Le Riche

INTRODUCTION

Repairing in the community is not only very worthwhile but a lot of fun. Watch this video to see how a group in West London got started!

Step 1 — Repairing with Others

- Check out the section [Repairing with Others](#) in the Restart wiki.
  - Thinking of running your own Restart Party? Here's a "[Restart Party in a Box](#)".
  - A selection of [tools](#)you may need to get started, and to build up as you get established.
  - Accidents are rare, but you will need a set of [Safety Guidelines](#) such as these.
  - Great that you're saving the planet one gadget at a time. Even greater if you can [measure your impact](#), and what's more, it will help you to unlock funding.

To reassemble your device, just put everything back in the reverse order!
