INTRODUCTION

Over time, you may need to replace the battery in your tablet. This guide will show you how to replace your battery.
🔧 TOOLS:

- iFixit Opening Tools (1)
- Magnetic Project Mat (1)
- Phillips #00 Screwdriver (1)
Step 1 — Battery

- ⓘ Make sure the device is powered off before starting repair.

- ● Carefully remove the back cover with the blue opening tool.

- ⓘ It is best to start with one corner and work your way around the device slowly.
Step 2

- ⓘ You may have a piece of tape covering your strips, make sure to remove them before starting this step.

- ● Flip open the black tabs that are securing the black strips across the battery. This may require the plastic opening tool.
Step 3

- Remove the eight 3mm Phillips #00 screws surrounding the battery.

⚠ The screws are very small, use a magnetic board to keep track of all loose screws.

Step 4

- Remove the battery connecter by gently pulling up with your finger.

This document was generated on 2020-11-26 01:56:46 PM (MST).

Step 5

- Once the battery is free, gently remove the battery from the device.

⚠ The battery and the connecters are fragile, so use caution when removing it from the device.

To reassemble your device, follow these instructions in reverse order.
